

The Kautapen Group is a collection of 29 fishing and hunting lodges throughout Argentina, Chile, Uruguay, Mexico and The Bahamas. Since 1984 we've built decades of experience in high-end sporting travel, and we are proud to offer a level of service at our properties that matches the finest boutique hotels in the world, each with its own personality. Attention to detail is our highest priority both in the lodge and in the field. Each property has been carefully selected to give our guests direct access to the highest quality sporting opportunities, and luxurious accommodations that allow guests to unwind and recharge after the day's adventures.

Origins of The Kautapen Group

For generations the family “de las Carreras” had been successful in taming the wilderness of Tierra del Fuego for ranching, but the family matriarch, Jaqueline de las Carreras had a revolutionary idea in the mid-1980’s. She would invite sporting guests to this wild land to pursue some of the world’s most coveted trout- the sea run browns of the Río Grande. It was with her combination of elegance, grit, and spark, that would give birth to Kau Tapen Lodge in 1984. In the years that followed, sportsman and women from across the globe came to swing flies in the Río Grande’s currents for the outsized trout that would put Kau Tapen on the map. Nearly four decades after it serves as a blueprint for all of the Kautapen Group properties that emphasize quality sport, married to fine food and accommodation in a recipe that excites guests each and every visit.

Since the early days of Kautapen, the group has grown steadily under the thoughtful leadership and vision of current CEO Fernando Carreras. Along the way he has enlisted help from many who are like minded. Family friend Santiago Blaquier shared the vision, and the Kautapen Group now offers exceptional sport at twenty nine unique properties in Argentina, Chile, Uruguay, Mexico and the Bahamas. Though styles differ to suit the sporting opportunity at hand, the Kautapen bloodline is evident in every aspect of every lodge operation-to offer the highest level of sporting experience possible and focus daily on turning outdoor dreams into sporting memories.

WHERE IT ALL STARTED

Kau Tapen was the first fishing lodge on the Río Grande, opening its doors in 1984. Its name means “House of Fishing” in the Ona Language and here, in the heart of the Río Grande watershed, live the best pools on the river. If the walls of this magnificent lodge could talk, they would tell story after story of battles with huge trout over thirty-plus years. Kau Tapen Lodge embodies the fly fishing experience and to hundreds of anglers, it is their fishing home. On the river, short walks and shallow wading are the norm. Single or two-handed rods are both effective. Skate a bomber over a resting lie, or drift a nymph next to a cut-bank for Sea-Run Trout you’ve only seen in your dreams.

IF YOU ARE TOUGH ENOUGH

Villa María is the second of the De Las Carreras family lodges to open on the Río Grande after Kau Tapen, and has offered small private groups exciting fishing on some of the most productive pools in the lower river since 1994. Unlike Kau Tapen, which is located on the middle river, Villa María offers anglers first crack at newly arrived Sea Trout on the lower Río Grande. For fishermen who enjoy the challenges and rewards of two-handed rods, this is a dream come true! With friendly and dedicated house staff and guides, Villa María is very well suited to caring for small groups of friends and family.

IN THE SEARCH OF GOLD

Esteros del Iberá Reserve (from the Guaraní language, meaning “Bright Waters”) is one of South America’s most important freshwater reservoirs. Ranked as the second-largest wetland in the world after the Pantanal in Brazil, it’s also enormous. The area encompasses more than 3 million acres of flowing water gin-clear creeks, shallows, lakes, swamps, and lagoons. Pirá Lodge, in northern Argentina’s Corrientes Province, strategically places anglers at the southern tip of the expansive wetland; a habitat-rich bottleneck where the marsh and Corriente River ecosystems converge. Here, the Dorado is king.

EXCLUSIVITY MEETS THE PERMIT CHALLENGE

It was just a matter of time until Nervous Waters looked to Mexico- it's natural for us, as Mexico has a history of great hospitality, great guides, and a service culture that makes it fun to be a visitor. But we have been waiting for the right time and the right location and we have finally found both. A place in the Sian Ka'an Reserve, Quintana Roo, Mexico, where a challenging fishery awaits. Where you'll meet passionate fishermen like yourself and embrace the challenge of being face to face with a permit, and when not fishing, sharing knowledge, theories, stories, and permit dreams. We look forward to welcoming you to Mayazul Lodge - a small, elegant retreat in the heart of Mexico's "permit alley" where fly anglers have a history of success pursuing the black-tailed devil of the flats, the elusive and coveted permit. And while others have done it, nobody has done it like Nervous Waters; a small lodge on the water, single rooms and single guides, and a laser focus on getting anglers as many shots at permit as possible.

WORLD'S LARGEST STAGS IN THE FOOTHILLS OF THE ANDES

Owned by a pioneering Mendoza native, your hosts have been managing these Red Deer herds for the last 20 years. By introducing the best bloodlines from Europe and New Zealand, to the local stock, they have helped to foster some of the largest and healthiest herds in the country. Guests will stay at Atamisque Lodge located on a famous winery very close to the hunting ranch. For small groups we also offer accommodations at the main ranch house located right at the base of the foothills. This exclusive preserve spans over 20,000 acres and sits on the mid to upper levels of a vast ranch (150,000 acres). The property is set against a backdrop of some of the highest peaks in the Andes. Mount Tupungato, visible from every corner of the ranch, is one of the highest volcanoes in the world. The fertile valleys of the Mendoza Andean foothills provide great habitat for deer, giving them the nutrition they need to develop impressive racks, with some specimens naturally reaching the 400 SCI+ class.

These Chilean stags are completely wild and all hunts are fair chase on an unfenced ranch. No more than six mature stags are harvested annually, so the opportunity to hunt these stags are in high demand. Each hunter will be accompanied by an individual guide. QUINTESSENTIAL PATAGONIA RED STAG HUNTING

After years of scouting many areas, we have recently secured for our guests what perhaps is one of the finest Red Stag hunting ranches in all of Argentina. This area in northwest Patagonia at the foothills of the Lanín Volcano has it all: a healthy deer population, a breathtaking mountain country interspersed with lakes and streams, and a beautiful historic ranch with an amazing view of the Huechulafquen lake, offering an ideal high-country sporting holiday. The property is located in Junín de los Andes, very near the area where Red Deer from eastern Europe were first introduced in Patagonia, well more than one hundred years ago. The stags that populate this region are 100% wild free-roaming game that migrate through the terrain, even across the mountains into Chile and back. As with our other properties, we practice strict herd management, harvesting only mature stags that are at the pinnacle or on the downslope of their reproductive life. We focus on these elder mountain stags that come from the high Cordillera into the lower valleys looking for hinds during the rut.

CENTRAL EUROPEAN HUNTING TRADITION IN ARGENTINE STYLE

This 62,000 acre ranch is a Patagonian icon, located in the Junin de los Andes area that stretches from the high desert foothills of the Andes on the east to the jagged mountains on the west bordering Lanin National Park, near the border with Chile. This is the very property where Red Deer from eastern Europe, were first introduced to Patagonia more than a 100 years ago. The stags in this region are a 100% wild, free roaming, game that wanders through their natural migrations as they did in the beginning of the century. Estancia Collun-Co was established in 1909 by Mr. Robert Hohmann, a German immigrant, when he acquired the land. The property has remained in the family since then. The main ranch house was built in 1912 and then fully refurbished and modernized some years ago. Meanwhile the hunting lodge is also situated at the ranch main headquarters. A beautiful and cozy wooden English-style house that is in the middle of the estancia, with amazing views of the mountains. Like all our other properties, we follow a strict herd management here, harvesting only mature old Stags that are at the peak past peak in their reproductive life. We stalk these big mountain deer that live in the remote and high cordillera and come down into the ranch looking for hinds during the rut.
